Corporate Overview

netnuvem is a team of smart, passionate, experienced engineers and architects providing professional services, technical training and content development of next generation cloud and datacenter architectures. Our collaborative culture celebrates diverse perspectives and unique technical expertise that helps customers make an impact in their industry using existing and cutting edge disruptive technologies.

Our Services

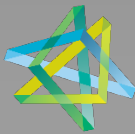

netnuvem has a proven track record of helping customers with Data Center & Cloud, Custom Software Development & Automation, Management & Orchestration, SDN, NFV and deploying Private and Hybrid Cloud. Our services are aligned with customer business outcomes to help optimize cost, reduce complexity and risk inherent with deploying Cloud based services.

- **Strategic Consulting Services:** Partner with you to understand your business requirements, analyze your existing infrastructure and future growth plans to develop an optimal solution for your environment
- **Security Services:** Design and implement the best security solution which provide before - during - and after attack remediation for your business. Our expertise help you achieve the highest levels of protection while optimizing costs.
- **Plan and Design Services:** Work closely with you from the initial planning stage through to deployment and operationalization of services to help achieve the desired business outcomes.
- **Implementation and Migration Services:** Engage with your team to develop a detailed implementation plan based on the customer design, including technical details to ensure a successful deployment.
- **Assessment and Optimization Services:** Perform audits and assessment to baseline the customer network including trending analysis to help identify performance issues that can impact data integrity and service quality. Provide best practices, recommendations and training to ensure the optimal performance of the network.
